No. 8 State Street—Boston.

THE subscriber, by appointment from the Commissioner of Patents, is Agent of the U S Patent Office for the purpose of receiving and forwarding to the same all such models, specimens of ingredients and manufactures as shall be intended to be patented, or deposited therein, which will be received and forwarded free of expense and risk to their owners, and with all possible despatch. The subscriber will prepare Caveats, Specifications, Assignments, and all the necessary Papers and Drawings, will make researches into American and Foreign works, for establishing the validity or utility of inventions, and render advice on all legal and scientific matters respecting the same. Patents procured in Europe and other countries.

By application at this office inventors are saved the time and expense of a journey to Washington and delay there, as well as all personal trouble in obtaining their patents. The experience of fifteen years practice—an extensive collection of rare works, documents, decisions, &c. on mechanical subjects and the Patent Laws—and patents of different countries, collected at much expense during the long time this office has been established, and to which daily additions are being made, together with accounts here kept of Inventions patented at Washington, enable me to afford important assistance and information to inventors desirous of securing Patents, which in other respects it would be difficult of attainment.

Kirkbride's Tattersall's
HEAVE POWDERS;

A SAFE, SPEEDY AND PERMANENT CURE *for Heaves, Broken Wind, Chronic Cough, Colds*, and all diseases which depend upon inflammation of the mucous membrane in the lungs, throat or nostrils of the Horse, or affect the **Soundness of the Animal's Wind.**

This remedy which has been used with such remarkable success in England is now offered to Horse owners in the United States as a positive specific for those obstinate and distressing complaints. From the combination of powerful vegetable ingredients of its composition it is enabled to compete successfully with diseases in the hardy constitution of the Horse, and at the same time is warranted to be perfectly safe and genial in acting gently by the use and other cattle, and does not at all hinder even the animal, or deter him from usual labor. The following are among many which have been of its efficacy. It is from one of the best Farriers in New York, and a gentleman whose knowledge in the medical treatment of Horses is very extensive.

New York, Nov 1, 1847

Messrs A H Gough & Co
Gentlemen—You will recollect that I bought a package of your Heave Powders some time ago to administer to a valuable Horse at livery in my stables, and that I was quite dubious of the wisdom of attempting to cure such a bad case as his was and did not, in fact believe there were any medicines better for his complaint than those I had been in the habit of using during my extensive practice with Horses. But justice to you and your valuable remedy, requires me to say, that the single package cured the worst case of aggravated Heaves I ever saw and his wind is now perfectly good. I believe the cure is a permanent one.
Respectfully, Ed FLOYD, 108 Laurens-st.

Messrs A H Gough & Co—Gents I bought, about six weeks ago a package of Heave Powders to administer to a favorite Horse, who had been troubled with heaves for more than two years. His case was a very bad one and so severe as to incapacitate him from half his usual labor and had resisted all the remedies ordinarily used for this disorder. They had no effect but to slightly diminish the violence of the heaving while taking the medicine, but that package of your remedy has completely eradicated the disease and now his wind is as good as ever it was. It is a month since he has taken the Powders, and I can warrant him sound.
Respectfully GEO M DAVIS
Monroe, Middlesex Co, N J

GREAT CONDITION MEDICINE.

Besides their specific action upon diseases of the lungs and windpipe the Tattersall's Heave Powders, from their great alterative and restorative properties, are as effectual in acting as carminatives to the system for the removal of impurities of the blood and predisposition to disease. Many cases of founder has been prevented and cured by a few doses of the Heave Powders, when thrown into the feed that is given to the heated animal after a hard drive or exposure to inclement weather. They are warranted to cure the worst cough in a few days and will wholly eradicate a cough sold by the use of 1 or 2 doses. As a condition medicine they are unequalled, especially when a tight hide, staring coat, loss of appetite, etc, denote a derangement of the digestive functions, or existence of bots and worms in the alimentary canal, as described in the following certificate.

Messrs A H Gough & Co—That package of your Heave Powders that I bought of you for my horse's cough has entirely cured him, but in a different way than I expected. The first dose of Expectorant Powder that I administered brought away an immense number of worms from him, and I believe they were all the cause of his cough, rough coat, etc, which he exhibited, for that package has entirely cured him, his appetite is good, and he is now in prime condition. I cheerfully recommend your Heave Powders for worms as well as heaves. Yours, SAMUEL ROBERTS.
East Hampstead, L I, Oct. 28, 1847.

☞ CAUTION. As several imitations of this valuable and popular remedy are about being put up under the name of "Heave Cure," "Heave Compound," &c., persons are cautioned to beware of them, and to try no remedy but *Kirkbride's Tattersall's Heave Powders.*

No Stable should be without this famous preparation. Price 50 cents per package of sufficient to make a sure cure, and 6 doses.

Sold by A. H. Gough & Co., 142 Fulton-st., New York; ... Boston; and by Druggists generally throughout the United States.

DR. CUMMINGS'S
Compound Extract of Sarsaparilla and Dock.

THE articles above named are the principal ingredients of this medicine. With these, others of vegetable origin are combined, designed to render them more active, and consequently more immediately effective.

The Dock, or rather a species of it now ranks as a medicinal plant second to no one of the vegetable kingdom. With the aid of a distinguished chemist whom the proprietor has consulted in the preparation of the compound he has succeeded in overcoming the difficulty of preserving the extract of the root for any considerable length of time.

For many years the proprietor has tested in his practice the efficacy of the principal substances of the compound and is perfectly satisfied that they possess all the properties which have been ascribed to them. Recently he conceived the idea of uniting them, which has resulted in the production of the compound. In this the ingredients are found to act in harmony and to lose none of the qualities which they separately possess.

A larger portion of Sarsaparilla is soluble than has generally been supposed. This extract is not to be relied on and least liable to decomposition is procured by subjecting the root to the action of the menstrua usually employed in extracting its virtues for a long time, without heat or any other accelerating agent. None is permitted to be used in the compound that has not been obtained by this process and that has been less than a year in preparation.

The Compound is recommended for Scrofula, Erysipelas, Ulcerous affections, Eruptions and Mercurial diseases. Also for the numerous maladies arising from sedentary employments, occupations of a harassing and fatiguing nature, intense application, exposure to extremes of heat and cold, overtasking the physical powers, and other abuses of the constitution, among which are Neuralgia, Piles, Affection of the Liver, Bilious Complaints and Dyspepsia or Indigestion.

In diseases of warm climates with which the proprietor became familiar in his practice in Havana some years since the compound will prove particularly efficacious, both as a remedy and a preventative.

This medicine has been for some time in use in this city, where the proprietor has passed nearly half a century of his professional life. It was extensively prescribed by him while in practice, and it is believed to be in favor with his medical brethren in general to whom he is known.

Blackwood's Edinburgh Magazine.

The above Periodicals are reprinted in New York immediately on their arrival by the British steamers in a beautiful clear type on fine white paper, and are faithful copies of the originals—BLACKWOOD'S MAGAZINE being an exact *fac simile* of the Edinburgh edition.

They embrace the views of the three great parties in England—Tory, Whig and Radical—"Blackwood" and the "London Quarterly" are Tory, the "Edinburgh Review" Whig, and the "Westminster Review" Radical. The "North British Review" is more of a religious character, having been originally edited by Dr Chalmers and now since his death being conducted by his son in law, Dr Hanna associated with Sir David Brewster. Its literary character is of the very highest order.

Present and Future Prospect of France.

TRANSLATED FROM THE COURRIER DES ETATS UNIS—FOR THE WHIG AND COURIER

Since the publication of our extra of Saturday evening, we have received documents which throw new lights on the latest events in France and put us in the position of appreciating more clearly their origin and reach.

One of these documents is a letter from Paris of the 24th February, which gives the word of the submission, so sudden and so unexpected, of Louis Philippe to the will of the emeute of the 23d. This submission is explained by the defection of two legions of the National Guard and by that of the dismission of the Guizot ministry and electoral reform. A remarkable coincidence mentioned by our correspondent is, that the 5th regiment of the line which first joined the people had already been in 1830 the first to unite itself with the insurgents! The defection which Louis Philippe did not expect, determined him to enter the path of concession, by making the sacrifice of his cabinet. This sacrifice put an end to the first act of the revolution. The majority of the Parisian population saw in this a perfect complete denouement of the bloody drama of the day before, they were satisfied with the fall of M. Guizot and the promise of an electoral reform that expressly included the formation of the ministry of Mole, Dufaure and Billault. Paris again put on the appearance of a feast—Fighting had been given up, the hour of reconciliation seemed to have struck and the Parisians were animated only by curiosity in visiting the deserted barricades.

But suddenly a noise spread itself! During the night, the post of the troops of the line stationed in front of the Hotel des affaires etrangeres, had fired on the people, and five corpses of those who had fallen under the deadly balls were carried along by a crowd with cries of "vengeance." The people took arms again, appeared at the barricades, and the second act of the revolution commenced. The abdication of Louis Philippe, his flight from Paris, the formation of the provisional government and the proclamation of the Republic form the end of the second act, of which the greater part of the scenes recall the most tragic and striking times of our first revolution. Is there not for example, an affecting analogy in the visit of the Duchess of Orleans, coming in company with Duke de Nemours and the young Count de Paris, to beg the crown from the hands of the sovereign people, and the refuge that Louis XVI sought in the bosom of an assembly as deaf to his voice as the chamber has been to that of the august widow.

At last a proclamation of a provisional government is published in the "Moniteur" of Paris of Saturday the 26th of February. This proclamation contains a happy explanation of the class of men who compose the provisional government and the course they propose to follow. After having given the result of the news, the Editor of the "Courrier" goes on and says "The provisional government declares, as to its acts, 'that its wishes are for a republic, save the ratification by the people who shall be immediately consulted, that Paris and its elected do not pretend to substitute their opinions for those of France on the definitive form of government that the popular sovereignty will proclaim.'

This is a wise and laudable declaration, because it is an homage to the true principles of democracy, a new element of appreciation on the present and future of France. It is satisfactory to the exigencies of logic and to those who can come out of circumstances in bearing the double process of Republic and of Monarchy at the bar of the sovereign judge, that is to say, the nation.

Thus then the suspension of the monarchical government and the creation of the republican government are proclaimed in Paris only as provisional facts, as wishes submitted to the definitive judgment of the people. Can this state of things be maintained until the convocation of a constituent assembly? Will these wishes be ratified by the assembly? We believe that the probabilities are in favor of an affirmative solution of these two questions.

We do not conceal that powerful exertions will be made to restore monarchy, whether the people wish it or not for the profit of the Count de Paris. We speak no more of Louis Philippe although he is to a certain point has the right to regard his abdication as void, the conditions upon which he made it not having been accepted.—But Louis Philippe is henceforth an impossible man, he has been false to his reputation, to himself, and to his party. This man who has dreamed of the reconstitution of the family pact and of levelling the Pyrenees, who had wished to do the work of Louis XIV and act his imposing part, has, like a blamed actor fallen and disappeared from the scene. His fall has less greatness than that of Charles X for it has less excuse; supported by more resources he has surrendered with less resistance justified by less necessity—Charles X had shown his glory to France apropos of a great principle, that of his divine right; Louis Philippe has entered in a contest with the people apropos of a Dinner!—That people in whom he had recognized the right to dispose of a throne, he has not allowed to meet at the Table!

To fall so it is to fall too low ever to rise again. Thus do we look upon Louis Philippe as personally incompetent. If he makes an appeal in his own name to the army, this appeal will find deaf the regiments who have remained the most devoted to the cause of monarchy. If it is made in the name of his grandson, this appeal will find but little echo, we believe. Defeat has its contagion as victory has its fascination. Fighting in Paris, royalty could more or less prolong the conflict; but the day she quitted the Tuileries, her maternity, she had separated herself from her protecting Gods, she has lost ground. It is Antæus, raised from the soil which made all his strength, by the mighty Hercules. One can, with the fifty thousand men that Louis Philippe had remain in Paris, but once out, one cannot enter even with one hundred thousand.

Besides it would not be Paris alone that would have to be conquered again to-day; it would be the half of France. To the victorious phases of the republican capital will have answered those of Amiens, Rouen, all the cities of the Pas de Calais and the North, of Grenoble, Marseilles, Dijon, de [illegible] the school of [illegible], of Lyons whose working classes will be [illegible] with a [illegible] to [illegible] the opportunity to revenge the oppression of 1834. May this revolution restrain itself to the satisfaction of triumph, and not allow itself to be led to bloody reprisal!

Listening to the echo of these [illegible] which are answering from North to South and East to West, the most faithful part of the army will hesitate, for on whatever side they look they will feel that destiny is every where against thrones, and that the wind is on the side of Liberty. We do not believe, then, in the success of an open contest.

That of a moral contest having for its object to convert minds to the adoption of the Count de Paris, and of a regency does not appear to us less doubtful. The government is in the hands of the Republicans, and it is decisive [illegible] action of the monarchical party has not carried it from them, these powerful hands are going to use all the popular paste in such a way as to communicate an irresistible fermentation to the democratic leaven which lies in the hearts of the masses. This fermentation will be neutralized only in case the faults and excess of the new regime should spread alarm in the middle class and make this class, who form the majority of the national guards, take arms.—It is they that have made the revolution, they alone can undo it. That this revolution may have surpassed their intentions, and that they may be somewhat frightened at their work, it is possible, it is probable. They will attempt however to repress it only in case of imminent peril. Revolutions are torrents to which it is easy to open a passage, but more difficult to drive back again toward their sources. For our part we desire that they may not be obliged to attempt it, and this wish is the result of reflections that we believe to be wise and patriotic.

Before the events of the 22d, 23d and 24th of February, we were of opinion that the hour of republican government had not yet come for France, that the masses of its population were not sufficiently prepared for this political emancipation, and we have sincerely and loyally expressed that opinion. And we regard in this point of view, as deeply deplorable the occurrences which have made this fatal hour strike before the time assigned by the normal course of events. But since destiny whose eye sees far higher and farther than that of man, has prematurely hatched this future under the burning blast of popular anger we believe that it is wiser to submit than resist his decree. One thing is to prevent the fall of monarchy, and another to wish to raise it up when once it has fallen.—That which was wisdom, in our eyes, in the first case, would be foolishness in the second. To sustain and rebuild are two things. Now that the democratic flood has forced its way, one will be cautious how he opposes it, with only powerless and provisional obstacles. Better it is to dig it a bed and direct its course, than to attempt to vainly stop it. If they re-establish royalty in France after the revolutions of 1830 and 1848, we shall have to record one more revolution before 1860. But, this play, which consists in building houses and pulling them down periodically, becomes we must admit it, too puerile and too costly. Thousands of precious lives and years of commercial perturbation form the stake of this party engaged between the people and royalty. It is too much. A nation cannot live with this intermittent fever of revolt, and since a republic is the only panacea which remains to be tried against this chronic affection, we must submit ourselves in good faith to the necessity. Until now, one of the principal objections to the establishment of a republican form of government in France, has been drawn from the exaltation and the pretended versatility of our national disposition.

To this versatility they have seen fit to oppose an immutable government as a counterbalance. Perhaps they will be more logical and happier in giving a legal issue to our inconstancy in establishing a periodical divorce between the people and its rulers. The two revolutions of 1830 and 1848 would not probably have taken place if the constitution had allowed to the antipathies of France another remedy than that of violence.

Be it as it may the outward circumstances under which France is going to attempt the trial of the republican form, appear to us more favorable than they have been since 1831. In fact in glancing an eye on the map of Europe what does one see? France secure against an invasion on the side of Switzerland, by the last revolution of that country, which is going to give hand to the revolution of Paris, and, on the side of Piedmont, by the movements of Italy. She is no less secure on the side of Spain and Belgium, which will keep at least a perfect neutrality, if the example of France is not followed at Brussels in 1848 as it was in 1830. England on her side, will remain according to all probabilities an impassible spectator of events. Her interest and passions will equally advise her to it. Her passions, because she has been animated with the most hostile feelings to Louis Philippe since the marriage of the Duc de Montpensier, the consequences of which are to-day annulled. Her interest, because a war with France would create her serious dangers, of which the enthusiastic cries of the Irish of N. York are an eloquent symptom. England, herself, is dragged on by the torrent of reform. She has contracted a moral alliance with the radicals of Switzerland and Italy, she cannot without inconsistency and without peril, condemn in France that which she approves and favors elsewhere. These arguments on our part, are corroborated by the language that has been held by the London press at the first news of the fall of the French monarchy.—This fall has inspired her with no regrets in favor of the vanquished, no threats against the vanquisher. Far from that, the "Standard" of the 26th of February, a tory journal, contains words of remarkable wisdom and moderation. These sentiments will certainly be those of the English people and the rule of conduct of her government.

Thus France is safe on all her frontiers, excepting one, that of the Rhine; it is the only one that she may be called to defend, and she is in a condition to defend it against the rest of Europe combined. The only three powers from which she has to fear ill-will and coalition are Austria, Prussia, and Russia, she has having no points of contact with all, cannot act but with the consent of one of the two others, and in concert with them. [illegible] tion and of dissolution so numerous, and the position of France brought entire upon the Rhine would be so formidable that no one of them will be able, they will muster their forces with all doubt they will hold themselves on their guard, but they will not take the initiative of any aggression.

If France on her side takes this initiative (which a wise people will do everything they can to prevent) it will be only because an appeal will be made to her fraternity by Poland, by inhabitants of our ancient provinces of the Rhine or by other nations who shall have broken their chains. Well, even in this hypothesis of a general war, lamentable as it may be, the future of France seems assured to us. If the governments of the North of Europe are against her, she will have on her side the people, and the conflagration kindled by the torch of liberty would soon overspread the whole of Germany with its flames. Is not the fire kindled already in the ashes of Austria, where the slave race is struggling against the German race, where thousands of men without property, are enslaved by some Lords, monopolists of the soil, in Prussia, where royalty has already been forced to yield to the necessities of reform, in Bavaria where royalty has fallen into contempt.

Untroubled in her liberty respected in her inward strength, France will be able to accomplish without convulsion, we hope, her political and social regeneration. She will convert Europe to a Republic by the force of her example alone—Thrown in the career of battles she will come out triumphant, and will cut with the sword the knot which, were it not for that, would be cut by the hand of time. But whatever is the nature of her action and of her influence, the action will be powerful, the influence supreme. Having for an instant descended from the pedestal that had been erected for her by the Republic and the Empire, France has just ascended it again. She is henceforth the high priest of European liberty. May she not be obliged to sprinkle with more blood the altars raised by her hands to the enfranchisement of nations; may she fulfil peaceably this great priesthood abroad and at home.

Steamboating for the Season.

We understand that there are to be three steamboats running from this city to Boston, direct, the coming season, instead of one boat direct as heretofore. The Penobscot, which run through last year, is to continue upon the route. The Governor, which last year ran to the Railroad, and a new boat, the Senator are also to be placed upon the direct route.

On the opening of navigation the Charter Oak will be put upon the route between this city and Portland in conjunction with the Railroad, until the new boat STATE OF MAINE, is finished, when she will be placed upon the route in addition to the Charter Oak, or she may be withdrawn.

The T. F. Secor will resume her trips to the East, on the opening of navigation. The river boat Parratine, will attend as usual to towing and river business, and a new boat will be ready early in the season to engage in river business, towing, &c.

GODEY'S LADY'S BOOK, for April 1848.

We have received from the enterprising publisher of this elegant monthly, the April number, and find it both elegant and agreeable.

We prize very highly that feature in the monthly, that distinguishes it from all other monthlies which is that it furnishes plans of buildings, cottages, &c., and we could wish that the plans were accompanied, as they in reality might be with working plans of details, and full specifications, thus making the matter available to all, for actual practice, rather than suggestion to the local architect.

Mr Godey announces still a new feature, which is to be introduced into the May number, of printing in colors. Success say we, to the Lady's Book.

Mr. Webster's Speech.

The National Intelligencer holds the following language in relation to Mr. Webster's speech on the Loan Bill, and feelingly alludes to the peculiarly solemn circumstances under which it was delivered:—

"THE SENATE CHAMBER, YESTERDAY.—Mr. Webster yesterday addressed an attentive audience in the Senate, the lobby and the galleries, for more than two hours, in a masterly argument on the subject of the War with Mexico—its origin, designs, and disastrous consequences, on the objectionable features of the Treaty just sanctioned by the Senate, and, especially in a most emphatic remonstrance and argument against the admission of new States into the Union, to be formed from foreign territory.—We have hardly ever, perhaps never, known Mr. Webster so deeply moved and earnest. It was, we believe, the opinion of all his numerous auditory, that the speech was worthy of his highest fame, and certainly we never witnessed from him a more majestic display of intellectual power and of all the attributes of the most elevated Senatorial eloquence.

"How deep and solemn must not have been the convictions of public duty which prompted and sustained such an effort, when it is considered that the Senator had received only an hour or two before, a summons, by telegraph to the bed-side of a dying and beloved daughter! In obedience to this sad summons, Mr. Webster is now already on his way to Boston."

☞ We publish to-day a translation of the leading article of the Courier des Etats Unis, on the subject of the revolution in France. We are indebted for the translation to Mr. Leon, the accomplished teacher of the French Institute in this city.

THE UNION MAGAZINE OF LITERATURE AND ART, April 1848.

Col Bagbee has furnished us with this Magazine for April. It opens capitally, with two fine engravings a colored dress plate, and several wood illustrations. Its reading matter is attractive, and its purchasers will have no cause of regret.

☞ The "Ice Pokers" have been making some thing of a demonstration upon the stream ice for two or three days past. These faithful workers are the premonitory symptoms of the decay and weakening of the ice, and we may therefore expect it to leave our river in the course of a fortnight.

☞ A foreign medical writer, possessing candor has lately asserted that "Physic is the art of amusing the patient while nature cures the disease."

A French author tells the following story. It is illustrative of the "ruling passion strong in death." A Parisian usurer was on his death bed, and the priest, to awaken in him [illegible] of his approaching dissolution, held before his gazing eyes a silver crucifix. "No, I can't lend you sir," said he faintly, "[illegible] upon such a pledge."

BY THE LAST MAIL! FURTHER FOREIGN NEWS BY THE CALEDONIA!

The mail last evening brought us English papers and the general news from Europe in extra and regular papers.

The news of greatest interest relates to the movement in France—no more a family appearing to be a REVOLUTION in fact. The flight of the King and Royal Family to England, the continued authority of the PROVISIONAL GOVERNMENT, the recognition of their power, to a satisfactory extent by other governments, and the success of many of their chief measures of practical administration are the leading topics of the news.

Mixed however with this, appear some indications of dissatisfaction, on the part of the people and even of unsteadiness among the chief supporters of the new state of things. All other difficulties are aggravated by pressing commercial embarrassment and by the lack of bread and remuneration of labor among the people.

PARIS, Feb 25.

The Municipal Guard is dissolved. The guard of the city of Paris is entrusted to the National Guard under the orders of M. Courtais, superior commander of the National Guard of Paris.

A proclamation has been issued to-day by the Provisional Government for the organization of a moveable National Guard of twenty-four battalions.

The Castle of Vincennes has surrendered this morning after a very slight resistance. The most of the fortifications have surrendered.

2000 of the very finest young men of Paris were enrolled this day as National Guards mobiles. Their appearance was truly inspiriting. They have passed through the city singing the Marseillaise. Regiments of the line are arriving in Paris to replace those which had been disbanded.

An order has been given, by means of the telegraph, for the immediate liberation of all political prisoners, and to give them the means of joining their families.

The Presse says:—Five times during the day M. de Lamartine addressed the people assembled under the windows of the Hotel de Ville.—

The people became turbulent and were settled by his words and withdrew to become the safeguards of the government.

The Admirals of the Navy have all agreed to serve the Republic. Also most of the Generals of the Army.

Mr Rush the American minister waited upon the members of the Provisional Government and offered his congratulations. He was received with the warmest enthusiasm.

Lord Normandy had a long interview this morning with M. Lamartine. It was understood that his lordship was instructed to state that the British Government would not only recognize the Republic Government of France but that they were most desirous of cultivating the most friendly feeling towards France. The communication excited the most intense interest and gave great satisfaction throughout the entire capital.

The Ambassadors from Austria, Prussia and Holland, to whom M. de Lamartine had officially announced the proclamation of a Republic replied that they could not recognize the Government until they should have received instructions to that effect from their courts. The ambassadors intended it is said, to retire in the mean time some to Versailles and others to St. Germain en Laye, and to leave each a secretary in Paris for the transaction of ordinary business.

All the Diplomatic agents have been recalled.

Capital punishment for political offences have been abolished.

Slavery has been abolished in all the Provinces.

On the 4th of march at the demonstration of the funeral of those slain on the 22d, 23d and 24th of Feb. there appeared to be a complete fraternization between the people, the National Guard and the troops of the line, and the Provisional Government.

The Government has issued a decree calling a National Assembly to meet at Paris on the 20th of April. The electors are to choose the delegates on the 9th. Suffrage is to be direct and universal, and by ballot.

The chambers of Peers is of course abolished, and the Chamber of Deputies dissolved.

The failure of the house of Gouin & Co. has created great distress and a monetary panic.

PARIS, Friday March 10.

The forthcoming elections in France excite great attention. The Government were aware of the fearful importance of the matter and were with the temper and sagacity that had hitherto characterised their measures preparing for the crisis.

800 mercantile firms connected with the Paris Bourse waited on the Provisional Government to ask the further delay of a month on the bills due on the 15th ult. which by a decree of the government had already been extended to the 10th inst. Their demand not having been acceded to they were said to have threatened to dismiss their clerks and workmen, and announced their determination not to satisfy their engagements.

Some of the papers begin to complain of the new [illegible] measures.

In the British House of Commons on the 28th Feb Mr Hume inquired of ministers, whether it was their "intention to withhold altogether from any interference with the people of France and to leave them at liberty to choose what sort of government they please."

Lord John Russell replied that he had no objection to answer the question. He assured the House,—indeed he should hardly have thought it necessary to declare it, that "we have no intention whatever to interfere with the form of government, which the French nation may choose for themselves (loud cheers) or in any way to meddle with the internal affairs of the country." (Renewed cheering.)

FLIGHT OF THE ROYAL FAMILY.

The King and Queen, with two or three of his daughters-in-law fled together from Paris, and were several days reaching the coast. None of his sons were with him.

The king with his family landed at New Haven near Brighton on the 3d of March, in a state of destitution. They were received with respect by all classes.

The Duchess of Orleans and her son (the Count of Paris,) appear to remain in France.

Several of the grand children of Louis Phillippe were guests at Buckingham Palace.

The two sons of the ex King, the Duke d'Aumale, and Prince de Joinville, with their wives, were both at Algiers.

Louis Phillippe is treated with most marked respect in London.

Riots have taken place in England and Scotland arising chiefly from want of employment and oppressive taxes.

Liverpool March 11th.—Cotton.—Our Cotton market, which closed heavily yesterday, has been further depressed to-day, by the character of the intelligence received by the Hibernia steamer. Holders have pressed sales, and in some instances have accepted 1-8d reduction from yesterday's prices, but this has not been general. Only 2500 bales were sold.

Corn.—The transactions in Breadstuffs here yesterday were of a limited character, and the market extremely dull.

SPRING CLOTHING FOR THE BOYS!

A SILVER MEDAL was awarded to us at the Last Exhibition of the Mechanics' Association, IT BEING THE ONLY ONE EVER RECEIVED FOR Boy's Clothing in this city, and, so far as we know the second in this country—one having been previously awarded by the American Institute in New York.

The business in which we are engaged is one of IMMENSE LABOR and PERPLEXITY, and requiring no small share of MECHANICAL SKILL. It is well known that our Senior Partner was the FIRST in this city to MAKE AN EXCLUSIVE BUSINESS OF BOY'S CLOTHING! Or even to regard it as an object worthy the attention of any one possessing ordinary business capacity. We have now in our employ SIX CUTTERS OF YOUTHS' AND CHILDREN'S CLOTHING, EXCLUSIVELY, a larger number as we believe than was ever before similarly and permanently employed in any one establishment which we have any knowledge of.

We have at our command EVERY FACILITY for carrying on the above business SUCCESSFULLY and EXTENSIVELY and Purchasers will find at our store A LARGER ASSORTMENT OF WELL CUT AND WELL MADE YOUTH'S & CHILDREN'S CLOTHING, THAN IS OR EVER BEFORE HAS BEEN, exhibited in any other Establishment IN THIS COUNTRY!

Clothing Dealers will promote their own interests by purchasing Boy's Clothing OF US.

As the Garments are WELL SHAPED and PERFECTLY ASSORTED.

The sizes are indicated by numbers, and a printed tag is attached to each article so that any one after becoming familiar with the system will seldom find it necessary to try a second Garment.

OUR STOCK IS NOW UNUSUALLY LARGE!

Having taken advantage of the Dull Season we have employed an immense number of the BEST HANDS IN THE CITY. And at a time when they would otherwise have been idle, the work is therefore to be RELIED ON as being of the Very Best Quality!

OUR STORE Is a LARGE FOUR STORY BUILDING, the whole of which is occupied by us for The Display of Goods! There being no work people in the building with the exception of the Cutters. It will therefore appear conclusive that the Business must be Large!

The growth of it has been gradual although somewhat rapid—a not uncommon result of unfaltering exertion, together with a knowledge of one's business.

CHEAT AND GROW RICH!

THIS has been the secret principle of too many of the wholesale dealers in teas up to this time, and they have practised the most shameful imposition on the country merchant without any fear of detection. But a new era in the Tea Trade has come, and the Pekin Tea Company claims the honor of its introduction. They were the first to raise the banner of reform, on which it has inscribed the simple words—

"Pure Teas at Honest Prices."

A complete revolution has been the consequence. Let consumers of Tea everywhere look at what we have done.

1st. We were the first to send them Teas that used to be called too good for them before.

2d. We have driven out of the market a vast amount of trash and introduced a better class of teas than has yet ever been sold. Importers of Tea often come to us to get for their own use, and for their friends, fine qualities they can find nowhere else.

3d. We have reduced prices more than 25 per cent., both in Black and Green Teas. The wholesale grocers say we are ruining the trade, and call us humbugs. This we have done already and now see what we are ready to do.

1st. We will sell Teas by the single chest, half chest, or 14 pound box at the same prices that wholesale grocers pay to the importers when they buy by the hundred packages.

2d. The wholesale grocers allow only 12 lb at [illegible] the half chest. This [illegible] a chest. We will allow, in most instances, 14 to 15 pounds tare on the same.

3d. We [illegible] to sell every kind of tea from [illegible] per pound cheaper than the wholesale grocers do.

[illegible]

[illegible]

New York market than so good teas. We are resolved to overthrow this fraud, and now call upon agents in every town in the United States to come forward and buy the teas imported by the Pekin Tea Company and we pledge ourselves [illegible] not [illegible] they do not sell more teas than any dealers in the town, we will [illegible] one on without charge. This is plain [illegible] cannot be misunderstood. We [illegible] to the immense success of our agents in any part of the United States.

Agents wanted in every town in the United States for the sale of these teas by which they can make money, and confer a benefit upon the public by supplying the pure article.

CATALOGUE OF TEAS ON SALE AT THE WAREHOUSES OF THE PEKIN TEA COMPANY, 75 and 77 Fulton Street, New York.

The teas mentioned in this catalogue are done up in quarter pound, half pound and one pound packages—the first or inside wrapper is lead, the second wrapper is water proof paper and the third or outside wrapper is of Chinese rice paper. The Company sell none but good teas done up in this superior manner, all of them grown in the most luxurious districts in China. Country dealers may select as small a quantity of one kind as they like and have them packed in one chest. These teas also come in five pound Chinese packages called [illegible] and convenient, fanciful and portable shape.

(Persons residing in any part of the United States or Canada, can order any of the teas in this catalogue by letter in quantities to suit them. RECOMMENDATIONS.

Heretofore it has been very difficult indeed impossible, to always obtain good green and black teas. But now you have only to visit the ware rooms of the Pekin Tea Company, 75 and 77 Fulton st. to get as delicious and fragrant teas as you could wish for.—Daily Sun.

We have tried the teas imported by the Pekin Tea Company, 75 and 77 Fulton st. New York and if we live we will try them often. They are among the most delicious teas we ever drank, and retail them at wholesale prices.—Evening [illegible]

The finest specimens of green and black teas ever sold in this country are imported by the Pekin Tea Company. Those who want good teas at reasonable prices can always get them here.—[illegible]

[illegible]—The Pekin Tea Company, 75 and 77 Fulton st. have imported into this market some five hundred thousand dollars worth of the finest grades of green and black teas, [illegible] in the Celestial Empire. Done up in all the various fancy packages that Chinese ingenuity [illegible]. It is a privilege to buy teas at this great establishment, and a luxury and a comfort to drink them.—

They sell good teas only, and retail them at wholesale prices. Country merchants who wish to always sell good teas can always obtain them at this place on reasonable terms.—[illegible] & Enquirer.

The Pekin Tea Company, 75 and 77 Fulton st. are performing a great and good work, and will in a few years drive all the poor teas which have deluged this country and defrauded consumers out of the article out of the market. They import none but pure and fragrant teas and retail them by the single pound at wholesale prices. Families are always sure of obtaining good teas at this great tea warehouse in quantities to suit them [illegible] and at the same price that the merchants pay who buy to sell again.—[Daily True Sun.

The Pekin Company sell a delicious Oolong tea at 50 cts per lb. Consumers of tea who have been paying 75 per lb for this article are requested to compare it with the above and judge for themselves which is the best. If you can buy a better tea at [illegible] per lb than you have been getting at 75 you will be obliged to us for this notice. The best Young Hyson sold at this great tea establishment at 75 cts. It is better than any thing of the kind we have ever bought at one dollar.—[Commercial Advertiser.

If any of our readers desire to have good tea they can obtain it of the Pekin Tea Company.—[Mercury.

Pekin Tea Company.—We very cheerfully call the attention of all lovers of pure and fragrant teas both in town and country, to the great tea warehouse of this company. Our long acquaintance with the proprietors enable us to bespeak for them the entire confidence of the public. We know that their teas both in quality and price are all that is stated of them. Many a lover of the fragrant herb has been compelled to eschew the drink of tea in consequence of its injurious effects, and at length he has become hopeless of finding any of the imported varieties of teas in our market a kind which had not such an effect. In this, however, such persons will be agreeably disappointed. The Pekin Tea Company have commenced the importation of choice varieties of garden teas of most delicious flavor, cultivated and picked with great care which have heretofore never been introduced into this country except as presents to import[ers]. Among these they have an Oolong mild as a [illegible] and fragrant as a rose, which we specially recommend to all nervous persons. But all tastes can here be suited with the great advantage over others of getting a pure article at wholesale price however small the quantity.—[Golden Rule.

The Pekin Tea Company unquestionably sell the best teas imported into this market. That they sell them cheaper than any other establishment is a fact proven in a thousand instances since they have opened their store. We would advise our friends to call at this place and if they don't wish to buy at least to obtain a little pamphlet kept on their counter, entitled "Hints to Tea Drinkers" and therefrom learn a little useful information on the subject. The pamphlet is given gratis.—[Journal of Commerce.

We drink green tea, and for many years have been paying one dollar per lb for it, but thanks to the Pekin Tea Company we now get a better tea from them at 75 cents per pound. We drink one pound per week by which we are now saving 13 dollars a year, and enjoying better tea. Commend us to the Pekin Tea Company say we.—N. Y. Mirror.

STILL FURTHER PROOF OF THE POWER AND EFFICACY OF Thompson's Compound Syrup OF TAR, IN CONSUMPTION.

Philadelphia, March 1st, 1844.
I hereby certify, that in consequence of repeated and neglected Colds, my lungs became seriously affected, and for a long time I have suffered with violent pain in the breast, obstinate cough and difficult expectoration. The symptoms daily increasing in violence, I had recourse to various remedies with no avail, until I used *Thompson's Compound Syrup of Tar,* which effected a perfect cure before I had taken three bottles. Permanent Cure of Dyspepsia and habitual Costiveness.

To Dr Ralph.
DEAR SIR—I have, myself, almost no occasion for your inestimable Pills. I have used them say six years, as occasion required; and I have reason to suppose they have wrought a thorough and permanent change in respect to the functions of the stomach. From habitual costiveness, and the voiding of nauseous and slimy stools, I am completely relieved. The multifarious symptoms of Dyspepsia, with which I was once too well acquainted, have so entirely passed away, that I hardly know what they were. Any use you can make of this, or a more full development of my case, is at your service.
Except in an obstetric case, your book (Family Physician) and Pills have been the only physician in my house for six years!
There are many of my friends around, and more and more, who call for your Pills as a family medicine, and for chronic cases. Yours truly,
Horatio Waldo.

The Great Remedy for Gonorrhœa

GLEET, Stricture, and all analogous complaints, is Dr. DOUGLASS'S ARABIAN PASTE. Dr Douglass is well known, having practiced in the principal cities in the Union, during the last 40 years. His only reason for introducing the Paste in this public manner, is the consciousness that there are thousands of ill treated complaints in this city—thousands of individuals who are going down to premature graves by taking the miserable drugs of quacks.
Dr. D. most solemnly, affirms that during his practice of forty years, this Paste has never, in one single instance, failed of effecting a cure in a few days, without any change of diet or hindrance from business. He has had some of the most stubborn cases—cases that have resisted the regular course of treatment adopted by our first physicians, for months and even years, but after taking the Paste for a few days, the angry symptoms disappeared, and the patients were discharged, entirely cured.
If the unfortunate, instead of drugging themselves with quack nostrums, should purchase only one box of the Arabian Paste, we should not see so many emaciated bodies and sallow countenances as we do at the present time.
If in case this Paste should fail to effect a cure in the shortest possible time, [illegible] the price paid for it will be [illegible] returning the empty boxes.
For sale only by the original inventor and sole proprietor, Dr. PETER G. DOUGLASS, at his Office, No. 30 Union street, Boston, at $2 per box, where he can be confidentially consulted on every [illegible]

DISEASES OF THE Throat and Lungs.

COUGHS and Colds, the fruitful parents of Consumption, Bronchitis, Asthma, Pleurisy, and many other dangerous diseases, are too often neglected until the foundation of the lingering complaint is laid deep in the System. A Physician is then called in, who administers a few Palliatives, but declares the disease incurable, and the Patient in consumption of his own lot, dies. But why does he die? Simply because he does not resort at the proper remedy, but trusts the mere Specifics of a Practitioner rather than the infallible evidence of experience and the most authentic testimony. On this then is the only true one, the efficacy of

DR. VONDERSMITH'S INDIAN COUGH BALM *and Lung Balsam,*

have been thoroughly established. Let those who doubt, read the following testimonials which are merely samples of hundreds of the same nature.

The fire-brick Oven-top has proved to be of great value in absorbing the steam and heating the bread to rise and bake light, (equal to the house brick oven.) The brick is found to be more durable than the iron top. It also equalizes the heat around the oven, and a much more even bake is produced in this stove than any other stove known. It has a most perfect arrangement for roasting in front. The Summer arrangement for broiling, boiling, toasting, &c., is complete. The grate clears itself, discharging the ashes into the ash-pit. The flues are large, and so arranged as not to fill up with ashes. It is so arranged as to use but small an amount of fuel it requires to perform so great a variety of cooking. Dr. Townsend's
SARSAPARILLA,
THE MOST EXTRAORDINARY MEDICINE IN THE WORLD.

This extract is put up in quart bottles, it is six times cheaper, pleasanter, and warranted superior to any sold. It cures diseases without vomiting, purging, sickening or debilitating the patient.

The great beauty and superiority of this Sarsaparilla over all other medicines, while it eradicates diseases it invigorates the body. It is one of the very best Fall and Winter medicines ever known. It not only purifies the whole system and strengthens the person, but it creates new, pure and rich blood, a power possessed by no other medicine. And in this lies the grand secret of its wonderful success. It has performed within the past two years, more than 35,000 cures of severe cases of disease, at least 20,000 of these were considered incurable.

More than 3000 cases of Chronic Rheumatism,
2000 cases of Dyspepsia,
4000 cases of General Debility and Want of Energy,
7000 cases of the different Female Complaints,
2000 cases of Scrofula,
1500 cases of the Liver Complaint,
2500 cases of Diseases of the Kidneys and Dropsy,
3000 cases of Consumption;

and thousands of cases of diseases of the blood, viz — Ulcers, erysipelas, salt rheum, pimples on the face, &c. &c., together with numerous cases of sick headache, pain in the side and chest, spinal affections, &c. &c.

This, we are aware, must appear incredible, but we have letters from physicians and our agents from all parts of the United States, informing us of extraordinary cures. R. Van Buskirk Esq., one of the most respectable druggists in Newark N J, informs us that he can refer to more than 150 cases in that place alone. There are thousands of cases in the City of New York which we will refer to with pleasure, and to men of character. It is the best medicine for the preventative of disease known. It undoubtedly saved the lives of more than

5,000 CHILDREN, THE PAST SEASON,

as it removed the cause of disease, and prepared them for the summer season. It has never been known to injure in the least the most delicate child.

RHEUMATISM.

This Sarsaparilla is used with the most perfect success in Rheumatic complaints, however severe or chronic. The astonishing cures it has performed are indeed wonderful. Other remedies sometimes give temporary relief, this entirely eradicates it from the system, even when the limbs and bones are dreadfully swollen.

☞ Hear Mr Seth Terry, one of the oldest and most respectable lawyers in Hartford, Conn. The following is an extract of a letter received from him.

Dr Townsend—I have used one bottle of your Sarsaparilla, and I find it is excellent in its effects upon a chronic rheumatic pain to which I am subject, from an injury occasioned several years ago in a public stage. Please send me two bottles to the care of Dr Seymour. I have conversed with two of our principal physicians and recommended your Sarsaparilla. SETH TERRY.

Hartford, March 19, 1845.

CONSUMPTION CURED

Cleanse and Strengthen. Consumption can be cured. Bronchitis, Consumption Liver Complaint, Colds, Catarrh, Coughs, Asthma, Spitting of Blood, Soreness in the Chest, Hectic Flush, Night Sweats, Difficult or Profuse Expectoration, Pain in the Side, &c., have been and can be cured

Dr Townsend—Dear Sir: Nearly twenty years ago I took a violent cold, which settled on my lungs and affected me severely, indeed, finally it became a constant hacking cough, but not so severe as to prevent me from attending to my business. Within the last few years it increased on me gradually. At last I became reduced—I breathed with difficulty, and raised with my cough much bad matter, and for the last nine months previous to using your Sarsaparilla, had regular night sweats, indeed, my friends and myself supposed that I would die with the Consumption, but I have the happiness to inform you that to my surprise after using three bottles of your Sarsaparilla I find my health restored. It relieved me gradually, and I am now enjoying much better health than I have before in 20 years. I had almost entirely lost my appetite which is also returned. You are at liberty to publish this with my name in the papers, if you choose.

My little girl, who is three years old had a very bad cough the whole of last Winter. We became very much alarmed on her account. While using the medicine I gave her some of it and it soon entirely relieved her, as well as myself and she is well now and hearty, as any child I ever saw. She was also full of little blotches it took them away, and her skin is smooth and fair now, and I am satisfied she recovered her health from using your excellent medicine.

S W CONANT, 444 Bowery

GIRLS, READ THIS

You who have pale complexions, dull eyes, blotches on the face rough skin, and are "out of spirits," use a bottle or two of Dr Townsend's Sarsaparilla. It will cleanse your blood, remove the freckles and blotches, and give you animation, sparkling eyes, fine spirits, and beautiful complexion—all of which are of immense value to unmarried ladies.

GREAT FEMALE MEDICINE.

Dr. Townsend's Sarsaparilla is a sovereign and speedy cure for incipient Consumption Barrenness Leucorrhoea or Whites, obstructed or difficult Menstruation, Incontinence of Urine, or involuntary discharge thereof and for the general prostration of the system—no matter whether the result of inherent cause or causes produced by irregularity, illness or accident.

Nothing can be more surprising than its invigorating effects on the human frame. Persons subject to weakness and lassitude, from taking it, at once become robust and full of energy under its influence. It immediately counteracts the nervelessness of the female frame, which is the great cause of barrenness.

It will not be expected of us, in cases of so delicate a nature, to exhibit certificates of cures performed, but we can assure the afflicted that hundreds of cases have been reported to us. Several cases where families have been without children, after using a few bottles of this invaluable medicine have been blessed with a healthy offspring.

Dr Townsend: My wife being greatly distressed by weakness and general debility, and suffering continually by pain and a sensation of bearing down falling of the womb, and with other difficulties, and having known cases where your medicine has effected great cures, and also hearing it recommended for such cases as I have described I obtained a bottle of your Extract of Sarsaparilla, and followed the directions you gave me. In a short period it removed her complaints and restored her to health. Being grateful for the benefits she received, I take pleasure in thus acknowledging it and recommending it to the public. M D MOORE

Albany, Aug 17 1847 Cor Grand and Lydius sts

TO MOTHERS AND MARRIED LADIES.

This extract of Sarsaparilla has been expressly prepared in reference to female complaints. No female who has reason to suppose she is approaching that critical period, "the turn of life," should neglect to take it, as it is a certain preventative for any of the numerous and horrible diseases to which females are subject at this time of life. This period may be delayed for several years by using this medicine. Nor is it less valuable to those who are approaching womanhood, as it is calculated to assist nature by quickening the blood and invigorating the system. Indeed this medicine is invaluable for all of the delicate diseases to which women are subject. It braces the whole system, renews permanently the natural energies—by removing the impurities of the body, not so far stimulating the system as to produce a subsequent relaxation—which is the case of most medicine taken for female weakness and disease.

SCROFULA CURED.

This Certificate conclusively proves that this Sarsaparilla has perfect control of the most obstinate diseases of the blood. Three persons cured in one house is unprecedented.

THREE CHILDREN

Dr Townsend: Dear Sir—I have the pleasure to inform you that three of my children have been cured of the Scrofula by the use of your excellent medicine.—They were afflicted very severely with bad sores, have taken some four bottles, it took them away, for which I feel myself under deep obligation. Y'rs respectfully,

ISAAC W CRAIN, 106 Wooster-st.

Rahway, Jan 25, 1847.

A year since I was taken with the Influenza, and my whole system left in a debilitated state. I have continued taking it, and find that I improve every day. I believe that it saved my life, and would not be without it under any consideration. G. W McLEAN

From CONSTANT GUILLOU, Esq Attorney at Law and Notary Public Philadelphia

"From personal acquaintance with Jules Hauel—an experienced and fashionable Perfumer and Chemist—I was prepared to appreciate the numerous testimonials in favor of his different fashionable preparations. On trial of them in my own family, and some of them personally, I have more than realized these favorable anticipations,—they are, what they profess to be scientifically prepared and compounded. CONSTANT GUILLOU."

From DANIEL J DESMOND, Esq., Attorney at Law, Consul General of Pontifical States, Vice Consul of Austria, Sardinia, Portugal and Tuscany

"To Mr JULES HAUEL.

Sir—Though I have not the pleasure of a personal acquaintance with you yet a sense of duty to yourself and the public generally constrains me to bear my unsolicited testimony in favor of your different fashionable preparations. On trial of them in my own family and some of them personally, I do positively declare that they are what they profess to be, skilfully prepared and compounded. I am convinced of the great worth or merit of the Eau Lustral Hair Restorative, Shaving Cream, Nymph Soap and Rose Tooth Paste—I am fully satisfied of their intrinsic worth, and do heartily recommend them to all for the use and purpose they are intended. Nothing can excel the beauty and lustre imparted to the hair by the use of the Eau Lustral Hair Restorative. It invigorates the hair and promotes Regrowth. The Shaving Cream is unsurpassed and decidedly excellent, being a fine and highly emollient composition—it does not smart or irritate the skin, while the Nymph Soap operates beautifully upon the pores of the skin, and cleanses it from all impurities. The Rose Tooth Paste imparts to the teeth a pearly whiteness, and is well calculated to preserve the teeth and gums from decay. They are in their way invaluable.

"I have seen some of my friends who have used your Vegetable Liquid Hair Dye, its effect is really a wonder. It dyes the Hair in an indelible manner in a few minutes, and the color of the hair is really beautiful and none will detect the artificial colors, as it is so natural. Yours &c. DANIEL J. DESMOND
